Optional supporting narrative

As a predominantly primary academy trust we are aware that the majority of our staff are female (89%), this also includes our teaching staff and senior leadership team. Our support staff are also female with a significant number in part time and term time only positions. The gap has increased slightly this year with the acquisition of a further primary and through bringing in-house the catering service comprising almost exclusively female staff. There are also 17 men in the lower quartiles,

The data shown demonstrates this, with the vast majority of Key Positions in the Trust having female job holders, whilst this is balanced with the large number of females occupying valuable part time and lower hourly pay rate support positions. All roles are evaluated in line with the NJC and teachers pay scales regardless of gender. The Trust monitors this situation closely with the Unions and is confident that the pay gap is due to the structure of the workforce rather than differences in pay or promotion prospects.

Further segmentation of the data shows that for each of the Main Categories - Teaching, Teaching support and Administration staff, that the gender pay gap remains at 1% but when the data is combined the weight of female staff in the lower pay grades creates our gap. Women occupy 97% of the positions in the lower quartile dragging down the average across the Trust

We are actively seeking to recruit more male teachers through our SCITT and for school vacancies to address the balance, for the benefit of our children. We also ensure that our job roles are evaluated to ensure fair pay in each role and advertise each job with no gender bias.

There has been a significant change in the difference between Mean and Median gaps this year due to acquisitions made during this period. Large scale change is unlikely until more males are represented in the Lower Middle and Lower Quartile than the current 3% in these quartiles.
